

Pallet Fork

EDGE™

Shaft Style with Optional Spill Guard

Rail Style

FITS SKID STEER LOADERS

 ***Available in rail or shaft styles***

 ***Fork lengths from 36" to 72" available***

 ***Spill guard standard on rail style (optional on shaft style)***

Pallet forks are the essential tool for transporting bulky, baled or palletized materials. Use them in agriculture, construction or industrial applications.

Available in two styles, rail or shaft, with many mounts to fit your skid loader. Tines range in size from 36" to 72" on the rail style, and 36" to 46" on the shaft style. There are 60" extensions available for either style fork, and a spill guard available for the shaft style (a spill guard is standard on the rail style fork).
